

ALUMIGRIP®

High quality coatings for General Aviation aircraft

AkzoNobel
Tomorrow's Answers Today

The exterior livery of a business jet or personal aircraft is an important reflection of the owner. That is why AkzoNobel takes great pride developing products specifically for these customers. From topcoats with superior gloss and appearance to anti-corrosive structural coatings, AkzoNobel understands the needs of the General Aviation market.

Performing to industry specifications, the advanced Alumigrip® products push General Aviation coating technology forward to address key industry drivers like VOC compliancy, and the ultimate high-gloss finish.

Ease of application and fast process times make Alumigrip® the preferred choice for OEM and maintenance companies alike. Customers see their aircraft gain in value by a long lasting, high-gloss, buffable finish that has superb color retention along with excellent chemical and abrasion resistance.

With the industry's widest choice of design colors and effects, the Alumigrip® product portfolio offers customers unique and eye-catching premium paintwork.

It is the outstanding finish for which Alumigrip® is well known.

ALUMIGRIP® 4144 Corrosion inhibiting primer

This chemical resistant primer provides excellent corrosion protection and optimizes the adhesion of the exterior decorative finish.

ALUMIGRIP® 10P30-8 Sanding surfacer

This epoxy sanding surfacer provides fast build-up to cover rivets and seams, superior hang-up and easy sanding characteristics. The products' unsurpassed dry to sand time is leading to quicker process times.

ALUMIGRIP® 4200 Topcoat

Alumigrip® 4200 Topcoat provides premium gloss and superior Distinctness of Image (DOI). Due to its low viscosity, Alumigrip® 4200 Topcoat is smooth flowing and easy to apply. This buffable topcoat provides a long lasting, high-gloss finish with excellent chemical and abrasion resistance.

ALUMIGRIP® 4250 Topcoat

Alumigrip® 4250 Topcoat is intended for use for accent markings on business jets. Available in a full range of solid colors and unique special effects, the fast drying topcoat enhances the image and identity of the aircraft. Alumigrip® 4300 Clear Coat is applied over Alumigrip® 4250 Topcoat to achieve the ultimate high gloss, long lasting finish.

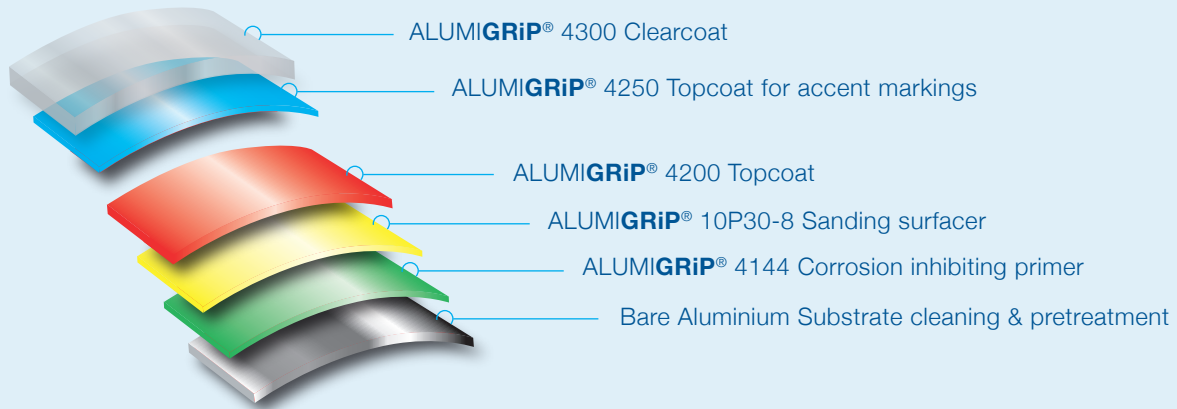

ALUMIGRIP® 4300 Clear coat

This polyurethane clear coat provides the permanent wet-look and superior Distinctness of Image (DOI) in addition to extended durability. The easy-to-clean and buffable surface is remarkably resistant to abrasions, stains, chemicals and dirt adhesion.
