

AeroShell Fluid 41

The 'Superclean' Hydraulic Fluid For Improved Performance

Many applications require the use of a mineral hydraulic fluid with improved performance. AeroShell Fluid 41 Particularly recommended for these applications, especially where the cleanliness of the fluid can enhance the Reliability of all components in the hydraulic system.

Why Buy AeroShell Fluid 41

41

Applicable for all modern aircraft applications requiring a mineral hydraulic fluid

Particularly recommended where use of a 'superclean' fluid can contribute to improvements in component reliability

Can be used in Aircraft systems operating unpressurised between -54°C to 90 °C and pressurised between -54 °C to 135 °C

Incorporated with red dye for the ease of identification to assist in the detection of leaks

APPROVAL

MIL-PRF-5606H

DEF STAN 91-48
Grade Superclean

H-515

OM-15

AeroShell Fluid 41 is also recommended for, and widely used in, non-aviation applications.

AeroShell Fluid 41 should be used in systems with synthetic rubber components and must not be used in systems incorporating natural rubber.

Whatever you fly, Aviocom can provide a full range of AeroShell oils, greases and fluids for your aircraft.
