

# **AeroShell Smoke Oil Intense, High-Persistence White Smoke**

# Crystal-Clear, Bio-Degradable White Oil, Free From Sulphur

## SMOKE TRAILS CAN HELP TO MAKE SPECTACULAR AEROBATIC DISPLAYS AND VIVID SKYWRITING

The smoke is typically created by vaporising mineral white oils or diesel in the hot engine exhaust. Therefore, the choice of material that is used to create this impressive effect on the sky is important. Based on the feedback our technologists received from aerial display pilots regarding the issues they were having with odour forming in the cockpit during the flight, we decided to look for an innovative alternative. Our aim was to provide an effective product to ensure the pilots could fly without experiencing such issues so that the show could go on. The result is AeroShell Smoke Oil: a crystal-clear, inherently bio-degradable, synthetic white oil that is virtually free from sulphur and other impurities. Crucially, AeroShell Smoke Oil vaporises readily in piston- and jet-engine aircraft exhausts to give an intense, high-persistence white smoke.

## A COMPREHENSIVE RANGE

AeroShell Oil W 15W-50 semi-synthetic, multigrade oil for reduced maintenance costs, fast acting protection and reduced fuel consumption compared with single-grade oil. AeroShell Oil W80/100 Plus for pilots who want a premium single-grade oil with extra wear and corrosion protection.

“For many years, AeroShell has been the exclusive provider of smoke oil for the SUN ‘n FUN International Fly-In & Expo – the second largest event of its kind in the USA. With hundreds of high-performance flights, every component of our operation has to be perfect. AeroShell’s smoke oil has provided reliable and consistent quality, and its service and supply are second to none. SUN ‘n FUN proudly recommends AeroShell Smoke Oil for your event.”

*Greg Gibson, Air Show Director, SUN ‘n FUN International Fly-In & Expo*

“Flying close-formation aerobatics is one of the most thrilling parts of our air shows. We have been using AeroShell Smoke Oil because of its superior performance and reliability. We trust AeroShell products and AeroShell Smoke Oil is the obvious choice for us.”
