Catch The Color The Smart Way

Automatchic 3 for Alumigrip 4250.

Handheld device catches color with total precision

Always exactly the right color: Automatchic 3

Based on latest LED Technology

Automatchic 3 is a hand-held tool and has been designed to meet the needs of professional painters. It is based on state-of-the-art LED technology. Three sensors make optimal positioning of the tool easy. Stray light barriers prevent interference from external light sources making sure you achieve the most accurate result. After reading the color, the software automatically searches for the closest color formula and optimizes this formula if needed. For very difficult colors, Automatchic 3 offers a tinting step which automatically tints the chosen formula. With Automatchic 3 you can easily find the best Alumigrip 4250 color formula for virtually any color in the air.

Easy to use

Automatchic 3 is a lightweight device making handling simple. Power consumption is very low and the device is fitted with regular or rechargeable batteries. Positioning is very easy and faulty readings are detected automatically. As we know, fast processes are vital to your success, calibration takes only minimum time. Operating the Automatchic 3 is straightforward.

Key benefits

- Find the right Alumigrip 4250 color formula without a color code

- High accuracy through latest LED optical technology

- Easy positioning with three sensors

- Software that prevents mistakes

- Fast measurement process

- Handy carry-case with calibration tools and accessories
