

Solvent Cleaning Wet Wipe System

Creating Healthier, Safer, More Productive Workplaces

Aviocom's pre-saturated wet wipe system

Aviocom provides the aerospace industry with a solvent cleaning product line that is developed to create a healthier, safer and more productive workplace. The color coded bucket is designed for all aerospace solvents like; IPA, MEK, Aceton etc. ,and the roll of aviation approved cleaning wipes fits perfectly in the bucket. One to Three, solvent containing bottles are pored into the bucket to saturate the wipe properly and the safety gloves provides up to 4 times longer protection than a thin nitrile glove.

1

Wet Wipe System

KIMTECH W buckets for more controlled dispensing and application of solvents. Color coded to indicate the different solvent types and re-usable

2

Aviation Approved Wipes

KIMTECH A2 (abrasive) or C3 (cleaning) wipes are the mid-tier cleaning wipes in a wet wiping system format.
1 roll = 60 sheets

3

Aerospace Solvents In Small Bottles

These 500ml bottles are the ideal packaging for providing small quantities of solvents directly into the bucket.
1 to 3 bottles required depending on the application.

4

Solvent Protection Gloves

The Jackson Safety G29 Gloves are suitable for various applications and offer reliable protection against a wide range of aggressive chemicals like **Isopropanol**, **Skydrol**®, **Frekote**® without compromising with dexterity
