

Nadcap certified Laboratory at your disposal

Gaches Chimie has a team of skilled chemical technicians with 20 years of experience in running the surface treatment line at Airbus Toulouse.

In an industry where accuracy is an absolute, having complete and supportive laboratory services for your surface treatment and penetrant inspection line is essential.

Gaches Chimie's process of producing raw materials allowed us to build a significant laboratory and perform associated services.

The members of our scientific staff have extensive experience in testing coatings and in analytical monitoring of surface treatment baths and non-destructive testing controls.

This experience resulted in robust and reliable methods for sample analysis, which, when combined with our data management expertise, enables us to provide you with unparalleled customer support.

An Independent Laboratory for You,

Our customer !

Our Technicians can visit your plant upon request to give technical support in setting up and qualifying your surface treatment line. Furthermore, they can also carry out the necessary adjustments and maintenance of your process tanks.

Our Nadcap accredited laboratory works for both European and North African customers. The analytical results are presented to you in very short turnaround times.

The analysis of your baths will:

- Provide a conformance report
- Give recommendations to adjust and maintain the solution
- Give accurate and detailed monitoring information (SPC analysis)
- Provide a life cycle record of the baths evolution

NADCAP accredited (Airbus and Boeing)

Nadcap (National Aerospace and Defense Contractors Accreditation Program) is a global cooperative accreditation program for aerospace engineering, defense and related industries.
